

EDUCATION

Carnegie Mellon University — *Pittsburgh, PA*

May 2029

Bachelor of Science in Information Systems + additional major in Human-Computer Interaction | QPA 3.81

Relevant Courses: Data Structures, Database Design & Development, Experimental Design for Behavioral & Social Sciences, Logic & Proofs, Designing Human Centered Software, Fundamentals of Programming and CS, Information Systems Millieux

NCAA Athletics: Carnegie Mellon Varsity Swimming (2025-present) - 2026 CSCAA Scholar All-American

WORK EXPERIENCE

Product Intern - AxiLab

May 2026 - August 2026

- AI sleep technology startup building personalized, real-time sleep optimization solutions through wearable devices.
- Evaluated AI-generated sleep plans through API-based testing across 6 LLMs and 60+ outputs on quality, prompt alignment, and cost; identified GPT-5.5 as a lower-cost alternative to GPT-5.5 Pro and drove the switch at ~83% lower cost per prompt. Applied structured problem-solving to identify failure cases and iterate prompts based on evaluation findings and product goals.
- Authored a PRD for an AI-driven daily sleep planning feature, translating user feedback, behavioral data, sleep research, and business strategy into personalization logic, recommendation prioritization, user flows, and success criteria.
- Sole designer for a complete mobile app redesign and new features for both the existing and redesigned apps, spanning 160+ screens and states across 7 feature areas and 25+ flows. Drove product innovation by independently conceiving new features from high-level company goals while translating product requirements and user research into high-fidelity interfaces and a scalable design system.
- Rebuilt the company website frontend for a major redesign, improving responsiveness and interactivity; supported beta operations for 50+ users through user communication, feedback analysis, device/app log reviews, and engineering collaboration.
- Built Looker Studio dashboards on BigQuery data to support product analysis.

EXPERIENCE & PROJECTS

Research Assistant - Computer Supported Collaborative Learning

Sep 2026 - Present

- Evaluating human-LLM disagreements in AI-based collaboration assessment, with a focus on identifying failure patterns, refining LLM prompts, and measuring improvements against human-reference baselines.

Social Media Team - CMU Swim & Dive

Jan 2025 - Present

- Posting content for the CMU swim & dive Instagram account, member collaboration to generate ideas and manage posts.

Research Assistant - MetaBeads

Oct 2025 - Apr 2026

- Worked on the MetaBeads project at CMU's Interactive Structures Lab, exploring how modular beaded materials can enable adaptive, interactive physical structures. Focus on prototyping and material behavior for wearable and open-ended applications.
- Co-author of "MetaBeads: Enabling Shape- and Stiffness-Changing Interfaces through Beaded Metamaterials," officially accepted for presentation and publication at ACM UIST 2026.

Opus - AI Productivity App, Concept Design

Jan 2025

- Designed an AI-powered productivity platform focused on improving focus and task completion through personalized experiences.
- Defined product concepts including AI focus analysis, adaptive study plans, and collaborative study features to address user motivation and productivity challenges.

XR Safewear - AR Swimming Goggles, Concept Design

Aug 2024

- Developed an AR wearable concept to improve open-water swimming safety through user research, swimmer interviews, persona development, and exploration of real-time safety needs and challenges.
- Translated the uncovered user needs into product concepts including AR navigation, safety alerts, bone-conduction audio, and interactive swim experiences.

SKILLS

- **Programming:** Python, Java, SQL, HTML, CSS, R
- **Product & Design:** Figma, Product Management, PRD, User Research, UX Design, Adobe Photoshop, Adobe Illustrator, Canva, Sketchup, InDesign
- **Languages:** English, Mandarin
